EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Sheldon J. Moss on December 6, 2005.

The application has been amended as follows:

Claim 1, line 4, after "sheet", delete -- -like --;

Claims 19-28 are canceled.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: None of the applied prior art of record teach or fairly suggest the step of developing of the photothermographic material in a thermal developing device configured such that a distance between an exposing section and a developing section is not more than 50 cm and the photothermographic material begins to developed at a exposed portion thereof while another portion is still being exposed" presented in claim 1 and 6. Ogawa et al (US 6,288,370) discloses a thermal developing device having an imagewise exposing section and developing section, but both sections appears to be far apart and fails to teach or fairly suggest the modification within the configuration presented in the claimed invention. Accordingly, the claimed invention is patentably distinct from that disclosed in the applied prior art of record.
